

1 10. (Amended) A method according to claim 9, wherein the regular expression
 2 and the exemplary expression in question are compared by means of a given reference
 A3
 Cmelld. algorithm that returns an edit script.

1 11. (Amended) A method according to claim 10, wherein the regular expression
 2 and the exemplary expression are compared by means of a reference algorithm that returns
 3 the shortest possible edit script.

A4
 16. (Amended) An arrangement according to claim 15, comprising means for
 modifying the extracted elements so as to be uniform in format.

In the Abstract:

Please replace the paragraph beginning at line 1 of the Abstract page with the
 following rewritten paragraph:

--ABSTRACT OF THE DISCLOSURE

5 The invention relates to a method for generating rules, by which method data can be
 regrouped. In addition, the invention relates to an arrangement for realizing this method.

A5
 Cm-t
 The object of the invention is to realize a method and arrangement whereby even a user
 without any skills in program-writing can generate extraction rules for data areas chosen
 from the source data. In the method, the information contained in the original data is treated
 10 so that from the original source data, the user selects at least two exemplary cases. On the

A5
Concl. basis of the exemplary cases pointed out, there is generated a set of rules, and the data areas according to these rules are extracted from the original source data. The extracted data areas can be further processed in a desired way.--
